PROFESSIONAL SUMMARY

Dot Net Developer with 1.5+ years of experience building backend systems and REST APIs using C#, ASP.NET Core, and ASP.NET MVC. Skilled in Entity Framework Core, ADO.NET, SQL Server optimization, JWT authentication, and clean architecture. Experienced with Web API and Angular for full-stack feature delivery, and integrating AI-driven tools using the Model Context Protocol (MCP).

TECHNICAL SKILLS

.NET Stack: C#, ASP.NET Core, ASP.NET MVC, Web API, Entity Framework Core, ADO.NET

Databases: SQL Server, MySQL

APIs & Integration: REST API Development, JSON-RPC 2.0, Model Context Protocol (MCP), Swagger/OpenAPI

Security & Architecture: JWT Authentication, Role-Based Access Control (RBAC), Clean Architecture

Tools: Git, Visual Studio, VS Code, Postman

Frontend (Supporting): Angular, JavaScript, HTML5, CSS3

PROFESSIONAL EXPERIENCE

Software Developer, Neosmar Solutions

Apr 2026 – Present

- Build and maintain web application modules using ASP.NET Core, C#, and ASP.NET MVC in an agile team environment.
- Design and consume REST APIs for internal business tools, following clean architecture principles.
- Write optimized SQL queries and stored procedures for reporting and data management.
- Participate in code reviews, unit testing, and Git-based collaborative development.

Project: MCP (Model Context Protocol) Analytics Integration

- Integrated an MCP analytics layer enabling AI-driven sales reporting through Claude, secured with SHA-256 API key authentication and rate limiting.
- Built a get_sales_stats tool querying live SQL Server stored procedures to return store-level KPIs across 65+ locations.

Project: LLM-Powered E-Commerce Shop Assistant

- Integrated an LLM-powered chat assistant for an e-commerce platform to handle product queries and order support.
- Designed the integration to support multiple LLM providers/models with flexible switching and natural language understanding.

Software Developer, Talent On Lease

Feb 2025 – Mar 2026

- Developed and maintained Web APIs using ASP.NET Core and C# following layered and clean architecture.
- Implemented database operations using ADO.NET and Entity Framework Core; optimized SQL queries for performance.
- Built scalable Angular SPAs using components, services, and routing, integrated with backend Web APIs.
- Managed debugging, testing, deployments, and Git-based version control.

Project: MSII (Management Self-Identified Issues) Workflow System

- Developed workflows for issue submission, corrective and preventive actions, and risk tracking.
- Implemented multi-level approvals with role-based access control and real-time tracking dashboards.

Project: Fraud Management System

- Built REST APIs for fraud reporting, investigation, and review workflows with secure RBAC for Admin, HR, Finance, and Legal users.
- Developed optimized SQL stored procedures and audit logs for activity history tracking.

EDUCATION

B.Tech in Computer Science and Engineering

Jai Narain College of Technology | 2020 – 2024 | CGPA: 7.7

CERTIFICATIONS

- Full Stack Development – TAP Academy, Bangalore
