PROFESSIONAL SUMMARY

.NET Developer with 1.5+ years of experience building backend systems and REST APIs using C#, ASP.NET Core, and ASP.NET MVC, with hands-on delivery of Angular front-ends for full-stack features, often owning features end-to-end in agile team environments. Strong in REST API design, SQL optimization, JWT-based authentication, role-based access control, and clean architecture. Experienced integrating AI-driven tools via the Model Context Protocol (MCP). Actively seeking full-stack or backend developer opportunities working with .NET and Angular.

TECHNICAL SKILLS

Languages and Frameworks	C#, ASP.NET Core, ASP.NET MVC, Web API, Angular, JavaScript, HTML5, CSS3
Databases	SQL Server, MySQL, T-SQL, Stored Procedures
Architecture and Security	Entity Framework Core, ADO.NET, REST API Design, JWT Authentication, Role-Based Access Control (RBAC), Clean Architecture
Tools and Practices	Swagger / OpenAPI, Git, Postman, Unit Testing, Agile / Scrum

PROFESSIONAL EXPERIENCE

Software Developer | Neosmar Solutions

April 2026 - Present

- Build and maintain web application modules using ASP.NET Core, C#, and ASP.NET MVC in an agile team environment.
- Design and consume REST APIs for internal business tools, following clean architecture principles.
- Write optimized SQL queries and stored procedures for reporting and data management.
- Participate in code reviews, unit testing, and Git-based collaborative development.

MCP (Model Context Protocol) Analytics Integration

- Integrated an MCP analytics layer enabling AI-driven sales reporting through Claude, secured with SHA-256 API key authentication and rate limiting.
- Built a "Get Sales Stats" tool querying live SQL Server stored procedures to return store-level KPIs across 65+ locations, enabling real-time business decision-making.

LLM-Powered E-Commerce Shop Assistant

- Integrated an LLM-powered chat assistant for an e-commerce platform to handle product queries and order support, reducing manual customer service workload.
- Designed the integration to support multiple LLM providers and models with flexible switching and natural language understanding.

Software Developer | Talent On Lease

February 2025 - March 2026

- Developed and maintained Web APIs using ASP.NET Core and C# following layered and clean architecture.
- Implemented database operations using ADO.NET and Entity Framework Core; optimized SQL queries for performance.
- Built scalable Angular SPAs using components, services, and routing, integrated with backend Web APIs.
- Managed debugging, testing, deployments, and Git-based version control.

MSII (Management Self-Identified Issues) Workflow System

- Developed end-to-end workflows for issue submission, corrective and preventive actions, and risk tracking across multiple departments.
- Implemented multi-level approvals with role-based access control and real-time tracking dashboards for management visibility.

Fraud Management System

- Built REST APIs for fraud reporting, investigation, and review workflows with secure RBAC for Admin, HR, Finance, and Legal users.
- Developed optimized SQL stored procedures and audit logs for complete activity history tracking and compliance requirements.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science and Engineering

Jai Narain College of Technology | 2020 - 2024

CGPA: 7.7

CERTIFICATIONS

- Full Stack Development - TAP Academy, Bangalore
